

# Wanted

## CTO - Rockstar needed

### Missions

As a member of the Executive Committee, you will work with the general management to study the major development issues facing the company in the short, medium and long term. As head of the Technology Department, your leadership skills are essential to ensure perfect coordination:

- Management of the technology team and our suppliers to ensure the management of both the build and run phases of our software
- Coordination with business development, customer success management, product development and marketing/communication
- Coordination with the finance department for the monitoring of budgets and financial indicators and negotiating the annual budget with the general management annual budget
- Definition and implementation of processes
- Coordination with HR for the anticipation and definition of recruitments

Achieving your objectives remains a team effort. You must therefore be able to unite the teams, to help them progress by accompanying them in their professional development and their increase in skills and to provide solutions to the problems encountered.

### Personal Requirements

You have an engineering degree, a Master's degree, an MBA or equivalent, and strong professional experience in a similar position.

#### Requirements

- Experience in the technological management of a hyper-growth company
- Experience in the banking and/or software
- Genuine agility culture
- Management of a team of 10+ people
- Excellent leadership skills
- Excellent interpersonal skills and excellent in English and French

#### The advantages of Wecan

- Offices in Geneva at the EPFL Innovation Park (campus biotech)
- Incentive plan and target-based bonuses

# About Wecan

Wecan is a Swiss based company created in 2015. We co-create, run and scale joint ventures to transform socio-economic paradigms through pioneering blockchain solutions. We address our partner's needs in different industries through our blockchain expertise and our co-creation process.

## Our vision

At Wecan, we believe that successful digital technologies are built around people and they are shaped by people's needs. After an era of exponential digitalization growth, the rise of mobile phones dramatically increased the usage of online service... We believe that the next 10 years will increasingly focus on trust, privacy and security. We believe that blockchain and decentralized infrastructure are a much-needed change to the way digital services have been built up to now. And we firmly believe that it is urgent to start putting those tools at the heart of business models right now.

## Why join Wecan?

From your first day, you will actively contribute to Blockchain innovative project using by companies with national and global reach. You will be working on projects to reshape businesses, invent new products, and transform some paradigms using the latest technologies.

**Could we spark your interest?**

**We look forward to receiving your application!**
