Senior Full Stack developer

Main mission

If you want to be part of an entrepreneurial adventure and contribute to the international expansion of Wecan Group as a Senior Full Stack developer, then this job is for you! Wecan Group is a leader in Blockchain based compliance data management solutions for the financial sector, and other industries.

The company offers a complementary suite of products:
- **Wecan Comply**: a blockchain-based data management solution designed to manage personal and business data in an efficient, structured and secure way, while ensuring compliance requirements.
- **Wecan Connect**: a blockchain-based instant messaging solution designed to securely manage exchanges between professionals and private individuals.
- **Wecan Chain**: a blockchain infrastructure on which the Wecan suite of products is based, enabling transactions to be anchored and thus ensuring the auditability and traceability of the information exchanged, with interconnectivity between applications.
- Its ERC-20 utility token WECAN is used to anchor transactions on the Wecan Chain.

We are looking for ambitious and driven individuals to support our rapid global growth.

Tasks

You will report to the CTO and work closely with Product Owners and UX Designer to help Wecan deliver applications with excellence at heart.

You will be responsible for the following activities:
- Design, develop, and maintain applications using Python with the Django framework for the backend and Vue.js for the frontend
- Work in conjunction with an external team to ensure a unified approach to project development, facilitating seamless integration and cooperation between internal and external stakeholders
- Collaborate with product owners, designers, and other stakeholders to gather requirements and translate them into technical specifications
- Write clean, scalable, and maintainable code using industry best practices

- Always keep an eye on security by following secure coding best practices
- Stay up-to-date with the latest trends and advancements in web development technologies and frameworks

Customer support / Troubleshooting:
- Analysis and resolution of incidents - 3rd level

Requirements

- 5+ years of experience as a Full Stack Developer
- Strong understanding of the Python programming language and the Django framework
- Proficient in front-end technologies, specifically Vue.js
- Experience with database systems, with knowledge of SQL, specifically PostgreSQL
- Familiarity with version control tools like Git
- Excellent problem-solving and communication skills
- Strong interest in blockchain technology
- Fluent in French and English is a must

Benefits

- An opportunity to work at the intersection of blockchain and financial sector
- A fast-paced learning environment, entrepreneurial spirit and team spirit
- A great moment to join as the company grows and expands
- State-of-the-art technology and IT infrastructure
- Hybrid remote work and flexible working hours
- Fun team events

As a fast-growing company with merit-based values, there will be significant career development opportunities for candidates with a proven track record.
